

Kirill Kazakov

Senior Site Reliability / DevOps Engineer

Co-author of "Kubernetes Cookbook" · CKA · AWS SAA · GCP Professional Cloud Architect · OSS maintainer · 500+ engineers mentored

Remote (UTC+3) · Open to relocation (worldwide)

Summary

Senior SRE/DevOps Engineer with 9+ years running production Kubernetes and AWS at scale - SLO/SLI design, incident response, observability, and capacity/cost engineering. Reduced pod startup from 3+ hours to seconds for 1000+ pods on EKS (featured in Learn Kubernetes Weekly #116), designed 4 Golden Signals observability across enterprise clients, and built GitOps/event-driven delivery for 100+ microservices. Most recently Senior DevOps Engineer at GlobalDots (through Feb 2026); part-time CTO at a DeFi startup, now focused on a full-time senior SRE/platform role.

Key achievements:

- Designed node warm-up strategy: pod startup from 3h->seconds for 1000+ pods on EKS - featured in [Learn Kubernetes Weekly #116](#)
 - Built 4 Golden Signals observability (Google SRE model) per environment; reduced time-to-diagnosis (Simplinic); Grafana + Loki + NATS monitoring for enterprise AI Security client
 - Reduced CI/CD time -9% and infra costs -5% via KEDA autoscaling and Karpenter FinOps (Justt)
 - Established SLO/SLA foundation and alerting from scratch; cut team support load 20h/week -> 1h (LiveSystem)
-

Technical Skills

Category	Skills
Reliability (SRE)	SLO/SLI design, incident response, post-mortems, 4 Golden Signals, zero-downtime rollouts (PDB), Spot reliability
Observability	Grafana, Prometheus, Loki, OpenTelemetry, Datadog
Kubernetes & Platform	Kubernetes, EKS, GKE, Helm, Karpenter, KEDA, ArgoCD, Argo Events, Argo Workflows, Gateway API
Cloud (AWS)	AWS - SoW assessment, MORA, MODA; architecture design & migration design for clients; broad service portfolio (EKS, ECR, event-driven, multi-client production)
Cloud (other)	GCP; Cloudflare (DNS, Workers, Pages, Zero Trust, IaC)
IaC & GitOps	Terraform, Terragrunt, GitOps, FluxCD
CI/CD	

Category	Skills
	GitHub Actions, Jenkins, GitLab CI - reusable pipelines, service catalog integration
Security	RBAC, OAuth, Network Policies, Zero Trust, CIS Benchmark
Languages & Tools	Python (automation, scripts), Bash, Docker, Linux, Git

Professional Experience

Senior DevOps Engineer (DevOps as a Service)

GlobalDots | Apr 2022 - Feb 2026

Platform and infra delivery for 6 enterprise clients (FinTech, AI Security, Public sector).

- **Node warm-up for EKS** - Pod startup from 3h->seconds for 1000+ pods with 3GB images; Init Deploy + DaemonSet pre-pulling, ECR + gp3 optimization, Spot reliability (Justt); [published solution](#) featured in Learn Kubernetes Weekly #116
- **Observability stack** - Grafana AWS managed + Loki alerts + NATS dashboard for an enterprise AI Security client (Gartner Cool Vendor 2024); Karpenter integration for the AI Security platform
- **KEDA + Karpenter FinOps** - KEDA autoscaling on message queue metrics (infra costs -5%); Karpenter bin packing and spot/on-demand mix (Justt; enterprise AI Security client)
- **Argo family integration** - Adopted ArgoCD (GitOps), Argo Events (event routing from AWS), Argo Workflows (processing jobs) as unified platform for 100+ microservices at Justt; eliminated config drift; authored [GlobalDots ArgoCD troubleshooting eBook](#) (10k+ reach)
- **Self-service CI/CD platform** - Built reusable GitHub Actions workflows and bash libraries for Justt (100+ microservices); standardized delivery across repos, reduced onboarding time for new services
- **AWS assessment & migration design (official AWS Partner)** - Owned projects from business case to delivery: SoW-based assessments, AWS Well-Architected reviews, MORA/MODA-driven analysis; migrations qualified for AWS partner funding
- **Zero Trust IaC** - Cloudflare setup, IaC + CI/CD for zero-trust architecture, sub-organizational access separation for a public-sector government client

Clients: Justt (FinTech); other client names not disclosed per agreement - Crypto/gaming, AI Security, API Security, Public sector

Chief Technology Officer (CTO) - part-time

Aura X Capital | Jul 2024 - present (*parallel to GlobalDots through Feb 2026*)

DeFi vault platform on TON (EVM in progress), 350,000+ users. Key cases:

- **Production reliability at scale** - Architected infrastructure for 1.2B+ user/on-chain transactions; platform scale 60k MAU, 7.5k DAU (RAUM Launchdrop, Omni DEX, Dynamic LP on TON)
- **Greenfield AWS infrastructure** - EKS, Terraform, FluxCD/GitOps from scratch; Grafana (GitHub SSO), Prometheus, Loki; reusable GitHub Actions CI/CD for ~20 services
- **Custom CDN** - Designed and deployed cdnn.cloud to bypass regional blockages; integrated with main platform

- **Engineering practices** - Established code review, CI/CD, and observability practices from day one

Lead DevOps Engineer

Simplinic GmbH (IoT healthcare) | Aug 2019 - 2022

IoT platform for hospitals (10k+ assets, 15 hospitals). Key cases:

- **4 Golden Signals observability** - Designed dashboards per environment in Grafana (Google SRE model); reduced time to find issues and analyze infrastructure
- **Security incident response** - Remote IoT device malware detection, diagnostics, and remediation without on-site access
- **Cost optimization** - GCP preemptible nodes for dev/stage (costs -10%); PDB for zero-downtime rollouts
- **Terraform self-service** - Custom Terraform modules for multi-env deployment; company-wide Terraform registry (S3 + gzip modules, semantic versioning)

DevOps Engineer

LiveSystem (WebRTC streaming) | Apr 2017 - 2019

Sole DevOps in a one-pizza startup. CI/CD from scratch (Jenkins, TTM -90%); IaC (Ansible, provisioning 3 days->3 hours); monitoring + SLO/SLA foundation (Zabbix, ELK). Support 20h/week->1h.

Key Deliverables

- **Observability at scale** - Grafana + Prometheus + Loki for enterprise clients and own platforms; 4 Golden Signals dashboards (Simplinic); Loki alerts + NATS monitoring (enterprise AI Security client)
 - **Node warm-up pattern for EKS** - community-validated solution (Learn Kubernetes Weekly #116); pod startup 3h->seconds for 1000+ pods
 - **Argo-based self-service platform** - ArgoCD + Argo Events + Argo Workflows as core platform for 100+ microservices; GitOps, event-driven pipelines (Justt)
 - **Terraform registry & self-service IaC** - Company-wide registry with versioned modules; dev/QA teams trained to consume IaC independently (Simplinic)
 - **Gateway API Helm Charts** - Open-source K8s Gateway API charts on [Artifact Hub](#) (maintainer)
-

Certifications

- Google Cloud Professional Cloud Architect (2025, valid through 2027)
 - AWS Certified Solutions Architect - Associate (2022/2025, valid through 2028)
 - Certified Kubernetes Administrator (CKA) (2021, CNCF/Linux Foundation)
 - GitOps Fundamentals (2022, Codefresh)
-

Education & Mentoring

- **OTUS** - Instructor (Kubernetes Platform + DevOps Practices), 2021-2025. 500+ students.
- **SkillFactory** - DevOps Engineer Course author, 2021.

- **Hackathon Judge:** Digital Breakthrough, IT INNOHACK, Globee Awards, MLH (12+ events).
 - **CI/CD workshops** - GitHub Actions workshops at AGORA HACK and IT_ONE DevOps Champion.
-

Thought Leadership

- [Kubernetes Cookbook](#) (2024) - Co-authored 171pp, ISBN, Amazon. Technical Reviewer - "Cracking the Kubernetes Interview" (Packt, 2025).
 - **30+ publications** (100k+ total reads) - [K8s Scheduler internals](#) (Habr, 20k+), [K8s security & RBAC hardening](#) (DZone), DNS observability postmortem (HackerNoon), Production Readiness framework (adopted by VP Deutsche Bank).
 - **Conference speaker** - DevOps 2021 (Pulumi vs Terraform, ~400 attendees); OTUS CONF 2024 (Gateway API vs Ingress); FaangTalk podcasts (K8s, Chaos Engineering).
-

Education

Saint Petersburg State University - Specialist Degree (5-year, equiv. MSc), Computer Software and Dataware, 2005-2010

Additional

- **Languages:** English (B2+, professional working proficiency), Russian (native)
- **Work setup:** Remote (UTC+3, overlap with EU hours); open to relocation worldwide (EU, Asia, US, and other regions)
- **Interests:** Reliability engineering, platform engineering, chaos engineering, open source, technical writing, mentoring
